

‘We see that one of Deafgard’s great advantages is its moveability, meaning that no alterations need to be made to individual rooms. The device is kept at reception and simply accompanies the guest to their allocated accommodation.’ Park Inn Executive Housekeeper

Deafgard

Deaf and hard of hearing people are in danger of not hearing your fire alarm. Deafgard is the moveable and cost-effective solution.

Deafgard is a cost effective, safe and quick way to ensure that deaf and hard of hearing people are alerted in the event of a fire.

The Equality Act 2010 states that service providers such as hoteliers and suppliers of sleeping accommodation are legally obliged to make reasonable adjustment for the disabled, which includes deaf and hard of hearing people.

In the event of a fire, deaf or hard of hearing people might not be able to hear the fire alarm, especially when they are asleep. This is a high risk, life threatening situation. Deafgard warns deaf and hard of hearing people when the fire alarm sounds whilst they are sleeping.

Deafgard is a battery operated, wireless unit with a pad attachment that simply goes under the pillow of the sleeping person. Deafgard is listening for a continuous fire alarm of 75dBA or higher, when the fire alarm sounds the pillow-pad vibrates, high intensity LED lights flash and an LCD screen displays 'fire'.

Features:
